Re: Carriage of Digital Television Broadcast Signals, CS Docket No. 98-120 (also CS Docket Nos. 00-96 and 00-2.)

Dear Ms. Dortch,

On July 7, 2005, Jerry Fritz of Allbritton Communications, Marsha MacBride of the National Association of Broadcasters, and the undersigned, had separate meetings with Commissioner Adelstein and his Legal Advisor, Rudy Brioché, with Commissioner Abernathy and her Legal Advisor, Lauren "Pete" Belvin, and with Commissioner Copps and his Legal Advisor, Jordan Goldstein to discuss the above captioned proceeding.

We expressed support for an action by the Commission that would permit broadcasters to elect "must carry" for cable carriage of either the digital or analog signal in the next must carry election deadline of October 1, 2005. Such an option would advance the DTV transition because it would likely result in cable carriage of more digital broadcast signals. At the same time, the option would not constitute a "de facto dual must carry" obligation. First, it is incorrect to assume that all broadcasters would elect must carry for the digital signal. Market considerations such as digital cable penetration, and technical and economic factors may cause some broadcasters to elect analog must carry. Moreover, many stations currently work with cable systems to enter into mutually satisfactory retransmission consent agreements for carriage of their digital and/or analog signals, and are likely to continue to do so. In any event, as we understand the proposal, the cable operator would be able to choose not to carry the analog signal of any station in the local market that elects must carry for its digital signal – a right that cannot properly be characterized as an obligation.
